1500 Series

First Due

Introducing the Phenix First Due 1500 Series 2007 edition. The new shell's interior circumference is 1/8" larger while the outer appearance is visually unaffected. The machining of our new shell incorporates current technology while keeping the integrity of the Phenix First Due at the highest level. Another improved feature is the "molded slot fitting" where the chinstrap attaches. The universal chinstrap attachment is now featured in ALL Phenix helmets. All models are standard with postman slide buckle chinstrap. The quick release or the combination postman slide with quick release chinstraps are available.

1500-2007G*

NAPE STRAP suspension liner with 8" earlaps, high temperature thermo plastic shell – closed cell energy impact cap – NFPA compliant goggles with retainers
– Nomex webbing chinstrap with postman slide and screw knob attachment kit
– 3M lime yellow reflective 1 x 4 strip (4). Approximate weight is 39 ounces.

1500-2007GR*

Same specifications as above model, with a ratchet suspension. Approximate weight is 39 ounces. This model is shown with the Paulson ATC goggle made for Phenix Technology; we also offer this model equipped with ESS Innerzone II goggles (see accessory page.)

1500-2007F*

NAPE STRAP suspension liner with 8" earlaps – high temperature thermo plastic shell – closed cell energy impact cap – 4.5" face shield with scratch resistant coating
– Nomex webbing chinstrap with postman slide and screw knob attachment kit
– 3M lime yellow reflective 1 x 4 strip (4). Approximate weight is 39 ounces.

1500-2007FR*

Same specifications as above model, with a ratchet suspension. Approximate weight 39 ounces.

1500-2007CA

NAPE STRAP suspension liner without earlaps – high temperature thermo plastic shell – closed energy impact cap – Nomex webbing chinstrap with postman slide and screw knob attachment kit – 3M lime yellow reflective strip (4). Approximate weight is 33 ounces. (This model is CAL and US OSHA compliant.)

Six Colors to Choose From

* These models are compliant to the NFPA 1971 current standard. For a list of updated questions and answers of NFPA guidelines and changes, please click on the NFPA FAQ link on our website: www.phenixfirehelmets.com

Approximate weight is 38 ounces. (Ideal for ROP and cadet programs.)

Universal Chinstrap

New standardized "molded slot fitting" chinstrap attachment point.

Our 1500 Series helmets have many interchangeable features that may alter the model you are choosing. Be sure to pay special attention to your desired options. Component options include: suspension, shrouds and chinstraps. Suspension liners come with a nape strap or ratchet system. Our standard suspension liners are fully adjustable from 6 1/2" to 8 1/2". Necessary sizing adjustments can be made. Shrouds are either sewn-in or detachable. Chinstrap options include: postman slide, quick release, and combination postman slide with quick release. For extra padding and comfort in your suspension system we offer a custom comfort pad. D-rings can be installed to hang your helmet.

TC1 Series

Traditional Composite Firefighting Helmet

Introducing the NEW, first ever Phenix Traditional Composite Firefighting helmet. This traditional leather look-a-like is sure to meet the needs of a firefighter who wants a traditional look without the added cost of leather. You will find the standard Phenix Technology comfort combined with superior fit. This helmet boasts the same center of gravity, low profile, and ergonomic correctness as all of our other helmet lines. We purposely used the same filigree from our TL2 with the 9/11 commemoration to stay consistent in our industry. Phenix Fire helmets refuses to be mistaken for any other line of helmets on the market!

Your complete "Standard" TC1 model is equipped with:

- High temperature compression molded composite shell with commemorative 9/11 filigree design.
- Standard colors: White, Red, Black, and Yellow
- Closed cell energy absorption impact cap
- Exclusive Phenix suspension liner with ratchet system
- Custom comfort pad installed on suspension liner
- Black detachable Nomex structure shroud(earlaps)
- Standard Nomex postman slide buckle chinstrap
- Paulson ATAC goggles with head strap
- American made brass eagle finial
- Your custom leather ID shield made exclusively by Sam Brown Shields (several styles and options available – "we make it your way")
- Helmet accessory pack. Includes: helmet band, 2 door wedges and a Garrity lite
- Reflective tetrahedrons (lime yellow for NFPA compliance)
- D-ring on rear brim for easy storage

Your standard TC1 model with all of the above components meets or exceeds current NFPA criteria

Leather Collectibles

These full or miniature sized hand-made leather collectibles can be customized to meet any occasion. They are terrific tokens for retirements, presentation, promotion, birthdays, awards or gifts. Each one is hand crafted with one of a kind workmanship. Our San Franciscan Replica helmets feature the Olsen and Gratticap filigree on the brim. Your high eagle style shield can be designed many different ways. We offer Sam Brown replica shields or you may choose our custom "RR" computer shields where we can incorporate your department's logo in the design work.

Our leather fire buckets replicated from the 1600's - 1800's were a standard in the home. The bucket was usually hung by the front door and had the owner's name, initials, or home address painted on them. Some buckets even had the family's coat of arms, while others were merely letters.

Leather suspenders are a must-have for firefighters. Have yours customized on the front and back straps with your name, initials, or a variety of die stamps to personalize them.

Miniature ID shield key chains are great for keeping your keys organized or at least in plain sight. Give as commemorative, celebratory, or as a token of your love for another. These can be customized to a certain degree with name, rank, or department.

Accessories

Magnetic ID Panel Systems

Our magnetic identification panels are designed for use as accountability systems. These 3.5" x 2.25" panels adhere to the sides of the helmet and can be interchangeable for various station assignments.

Aluminized Helmet Cover

NOW AVAILABLE: an aluminized PBI cover for the Phenix First Due. Customized to fit perfectly over the helmet, it can be used during training burns, municipal airport extreme heat fires, and protection. Its primary function is to reflect patch 95% of the "Radiant heat".

Sam Brown Leather ID Shields

Our ID shields are made from real leather and stamped with leather dyes and come in a variety of sizes, shapes, and colors. They can be customized for your individual department and rank.
